

# FLAP TYPE DIVERTER – FDV

The FDV flap type diverters are designed to divert powders and pellets in pneumatic conveying systems.

The FDV is available in two versions: the FDV-F type with flange ends and the FDV-P type with pipe ends. Both versions are available in aluminium, cast iron, and stainless steel.

For the FDV, there are three operating modes: a pneumatic actuator assembly, an electrical actuator, and manual operation.

## Available sizes

Size FDV-F	50	65	80	100	125	150	200	250
Size FDV-P	50	65	80	100	125	150		

## Specifications

- ▶ Compact form
- ▶ Optimal sealing
- ▶ Simple construction
- ▶ Minimal pressure loss
- ▶ Available with flange or pipe fittings
- ▶ Flanges drilled in accordance with PN 10, ANSI 150 lbs
- ▶ Cast iron, aluminium or 316 stainless steel
- ▶ Pressure range from -300 mbarg up to 2 barg
- ▶ Temperature up to +80°C
- ▶ ATEX 2014/34/EU certification available
- ▶ EC1935/2004 conformity available

## Product Information

The FDV diverter can be used in systems with positive pressures up to 2 barg and negative pressures up to 300 mbarg.

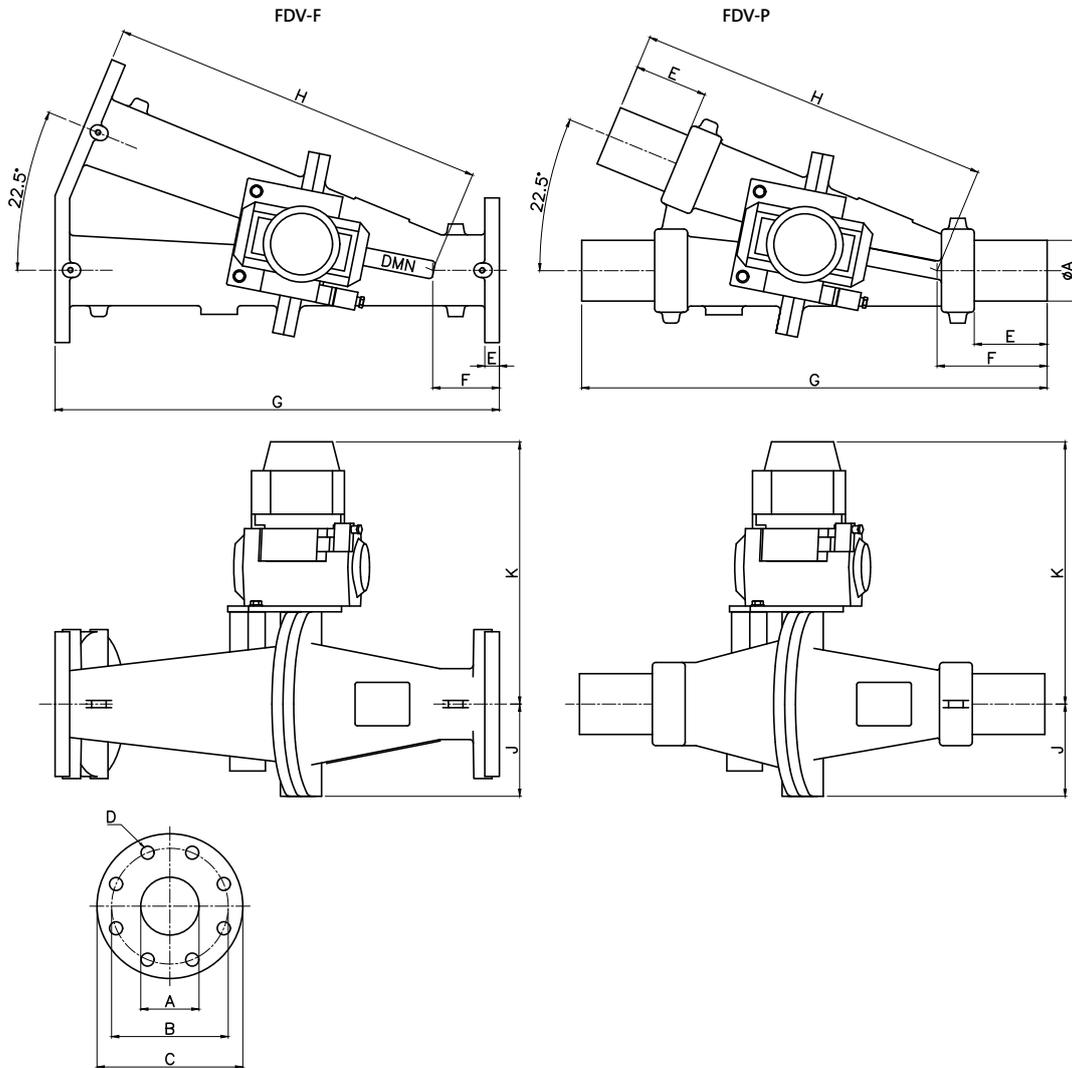

The standard polyurethane flap can be used for temperatures up to +80°C. Options for higher temperatures are available on request.

The flap assembly of the diverter can be fitted with a wear resistant flap or a food quality polyurethane seal, providing a virtual leak proof unit.

## Application

The FDV is suitable for the following industries:

- ▶ Food
- ▶ Plastics
- ▶ Animal feed
- ▶ Biomass
- ▶ Cosmetics
- ▶ Paint
- ▶ Minerals
- ▶ Recycling
- ▶ Batteries
- ▶ Tires
- ▶ Chemicals
